

# PACIFIC BIRDS

HABITAT JOINT VENTURE

**CREATING THE IDEAL ENVIRONMENT  
FOR BIRD HABITAT CONSERVATION**

## We convene and support people working to conserve bird habitat

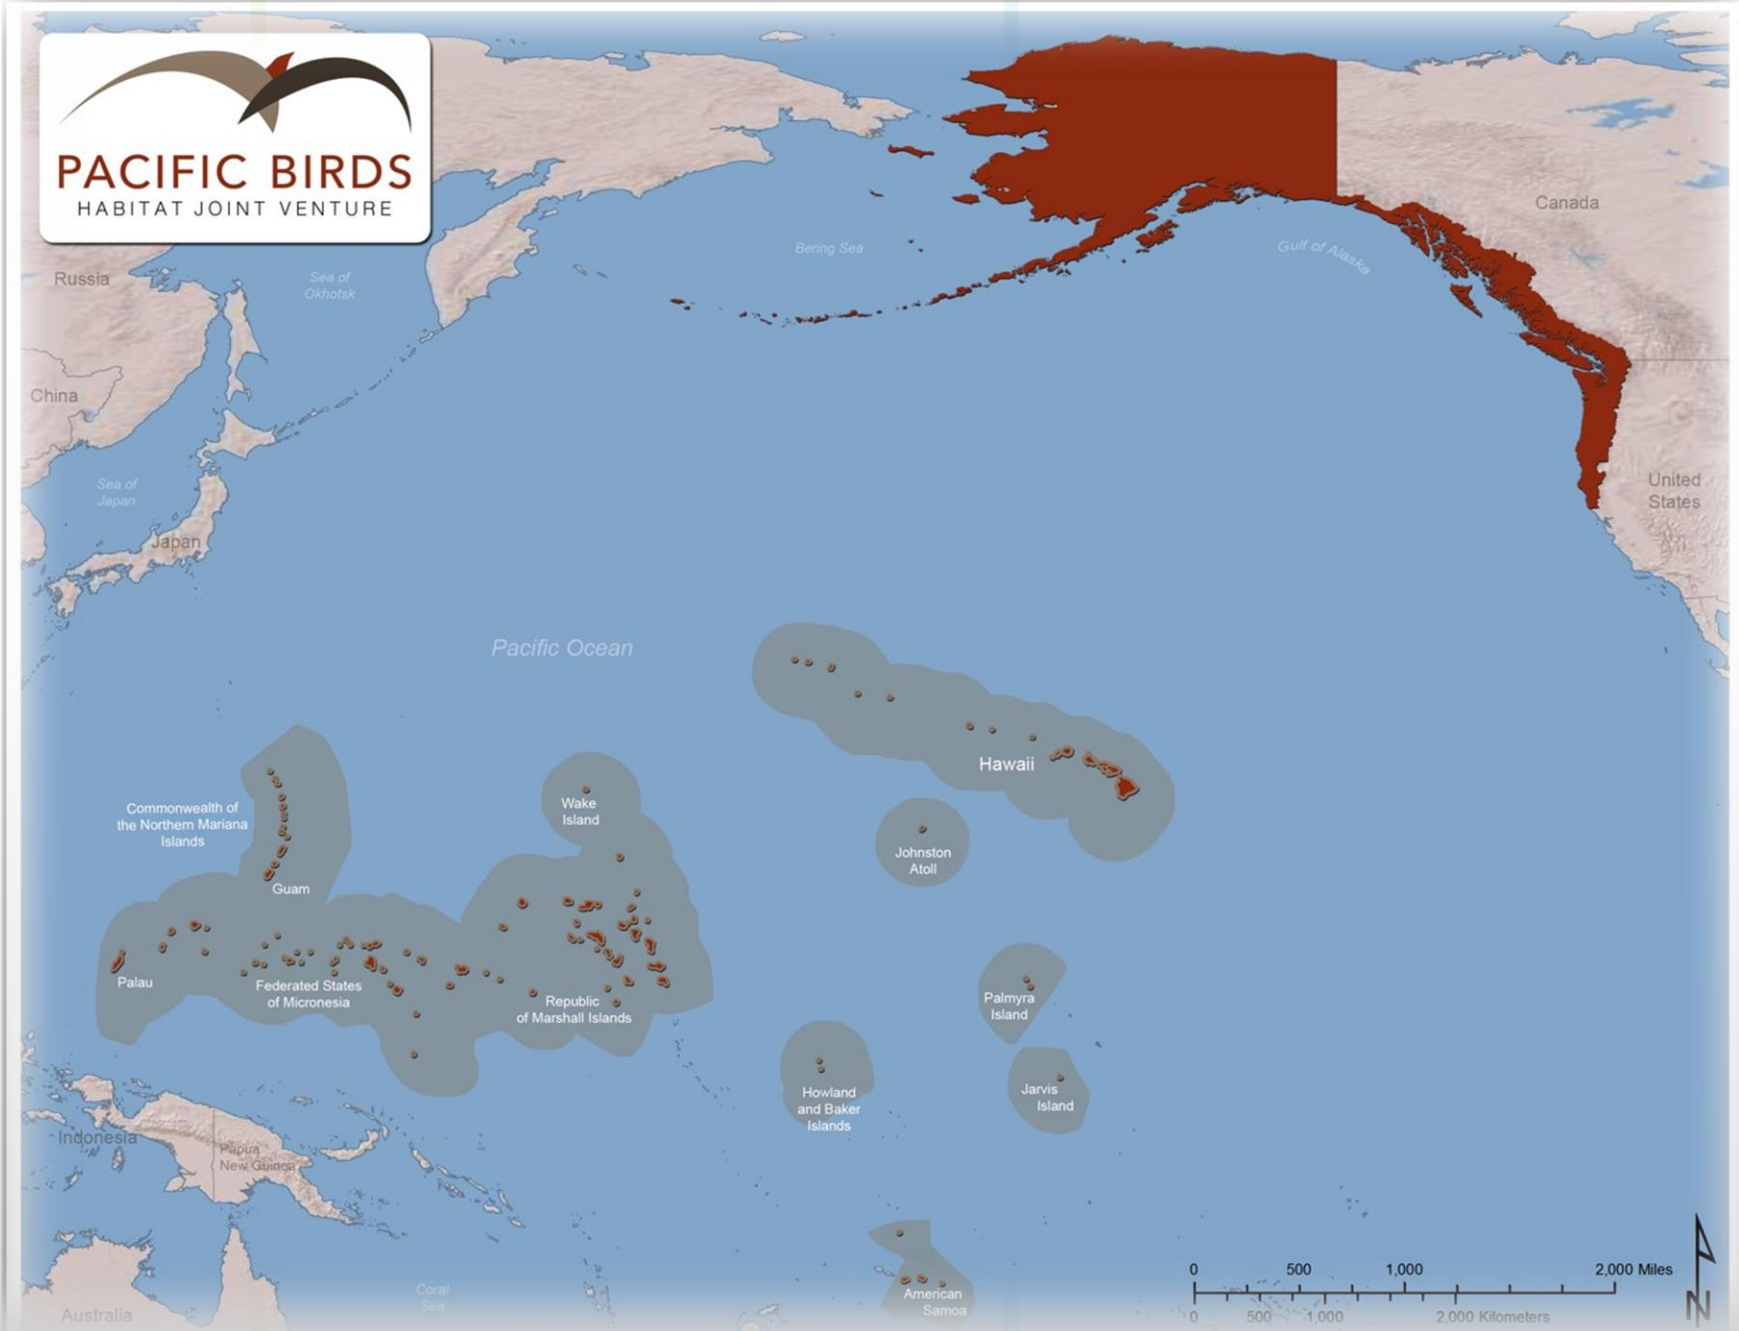

- More than ever, effective conservation requires landscape level cooperation leveraging of resources, identifying science gaps, plus building and maintaining extensive communication networks
- Today conservation issues are complex and partners recognize the need to consider full life cycle management needs of birds

Think Regionally – Benefit Locally

Conservation Priority**

LCD Project with  
NPLCC and  
USFWS

Determine  
Partnership  
Priorities

# Pacific Northwest Coast LCD

## **Project scope**

- Lower Columbia River and outer coasts of Oregon and Washington

## **Who's involved?**

- Federal, state, and local agencies, tribal sovereign nations, nonprofit organizations, industry, educational institutions, and private citizens

## **What are the outcomes?**

- Assessment of historic, current, and future natural resource conditions in the light of climate change and other stressors
- A community of collaborators that develop a set of strategies and actions for achieving shared conservation and related goals – a blueprint for a climate resilient landscape
- A web-based tool to visualize shared priorities and landscape science

# Pacific Northwest Coast LCD

## Pacific Birds

- Currently synthesizing partners' conservation priorities to identify a suite of coarse and fine filter targets
- Identifying key ecological attributes of those targets and current threats and stressors
- Use as baseline data in LCD Open Standards process
- Contact Sara Evans-Peters if you have any additional questions
  - [sara@pacificbirds.org](mailto:sara@pacificbirds.org) / 503-957-3282

## LCD timeline

- See more information (calendar, webinars, project plan, etc.)  
<http://columbiacoastblueprint.org>
- Next meeting in fall – this is a partner-driven effort, so come join!

THINK AS A PARTNERSHIP
